

colama™ is a virtual lab infrastructure management solution from Coriolis Technologies, a Pune based company. It is specifically designed, using patent pending technologies, to suit the typical computer lab environment in Indian universities. colama™ is unique as it can be deployed on existing desktops, servers and thin-clients or even a combination of them. This protects your current investments while allowing a seamless transition to thin-clients in the future.

colama™ is approved software. AICTE norms allow for thin-client based solutions and colama™ is currently in use at leading engineering colleges and training institutes across India.

## Savings on capital

### Reduction in capital outlay on computers

1. Fewer computers needed
2. Use existing desktops or inexpensive thin-clients
3. Requires significantly less storage per student
4. Create test machines on demand

### Reduction in capital expenses for software

5. Maximizes license utilization by time-sharing
6. Leverages opensource software

### Reduction in capital outlay on other infrastructure

7. Thin-clients lower demand on AC capacity
8. Thin-clients reduce UPS capacity requirement
9. Easy reconfigurability reduces labs required

## Savings on operations

### Reduction in hardware and software maintenance

1. Lowers AMC on thin-clients, AC and UPS
2. Enables self servicing of virtual machines

### Reduced lab administration

3. Eliminates individual desktop administration
4. Switch between grid or desktop environments
5. Enables centralized management of labs

### Reduction in power and cooling expenses

6. Thin-clients lower power usage
7. Reduction in cooling and UPS requirements
8. Improves space utilization

## Benefits

Reduces total cost of ownership (TCO) using thin-clients and virtualization technology

One-stop IT asset management and reduced IT administration overheads improves productivity

colama™ license tracker, maximizes the utilization of expensive licensed software

Complete traceability and accountability of computer usage, reducing legal liability

Improves computer to student ratio sans additional investments – students get individual machines

Pristine examination environment on demand

Powerful teaching aids in the lab

Go Green, be socially responsible the colama™ way
